A · Diffusion of a normalized Gaussian
Probability density
Position x
t = 0
t = 1
t = 4
t = 8
B · Two relaxing-current poles
Im ω
Re ω
ω+
ω−
C · Gravity–capillary wave phase speed
Phase speed / √(gH)
Dimensionless wave number q = kH
α = 0
α = 0.001
α = 0.01
α = 0.1
